

NATURAL WEED KILLER

For every 1 gallon of vinegar

Add: 1 - 26 oz (1# 10 oz) container of salt
 3 Tablespoons of blue Dawn dish soap
 5 Tablespoons of liquid arthritis rub

Mix in a 2 gallon hand sprayer. I pour in the vinegar first withholding some vinegar to rinse the top of the sprayer threads to remove any salt on it, then the salt, then the soap and finally the liquid rub. Shake well, ensuring all the salt is dissolved, pump sprayer, and spray; the weeds will begin to die quite quickly, within an hour or so you will see results.

The 'liquid arthritis rub' is called Dr. Fred Summit Arthritis Rub with capsicum, which is pepper. You can find this on Amazon. This is the "secret ingredient" that makes this weed killer so potent. You can find other arthritis rubs at Dollar Tree but they do NOT contain capsicum! Please NOTE - it is the capsicum that is the stronger ingredient. You can still use just the other 3 ingredients, which I have done, but they do not work as well!!!

HAPPY SPRAYING!!!!
